

Release

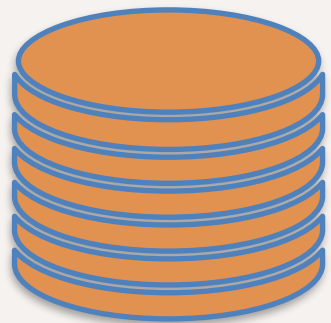

Add the column nullable

```
ALTER TABLE address ADD COLUMN zipcode TEXT NULL;
```

The code should write in the column

```
class Address
{
+  #[Column(type: "text", nullable: true)]
+  protected $zipcode = null;

  public create(
    string $street,
    string $city,
+   string $zipcode,
  )
}
```

Release

Update existing rows without value and
add the NOT NULL constraint

```
UPDATE address SET zipcode = `69000` WHERE zipcode IS NULL;  
ALTER TABLE address ALTER COLUMN zipcode SET NOT NULL;
```

```
class Address  
{  
- #[Column(type: "text", nullable: true)]  
+ #[Column(type: "text", nullable: false)]  
- protected $zipcode = null;  
+ protected $zipcode;
```
