

Release

Update existing rows without value and
add the NOT NULL constraint

```
UPDATE address SET zipcode = `69000` WHERE zipcode IS NULL;  
ALTER TABLE address ALTER COLUMN zipcode SET NOT NULL;
```

```
class Address  
{  
- #[Column(type: "text", nullable: true)]  
+ #[Column(type: "text", nullable: false)]  
- protected $zipcode = null;  
+ protected $zipcode;
```

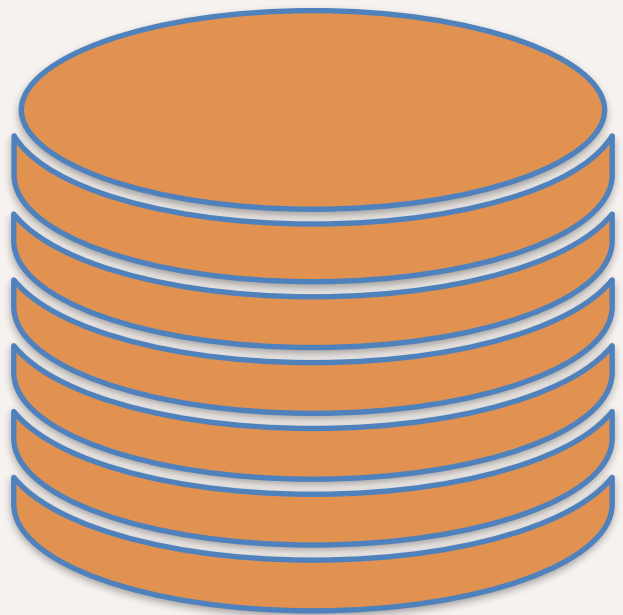

Release 1

- Add the column nullable
- Codebase writes in the column 🖋️

Release 2

- Update NULL rows with Default value
- Add the NOT NULL constraint 🔒
